

Hi there! Come join me (Johan) and my friends on an adventure through the magical world of ScienScape!

Check out all 14 scien-terrific episodes!

Going Home

Johan, Ani, and Moki learn about animals and their specific habitats.

Magnetic Adventure

Johan and his friends learn about magnets, magnetism, and how the compass works.

Guided by the Lights

Johan learns that there are only two sources of light—natural and artificial.

Drops of Life

Johan, Ani, and Moki set out to find where the rainwater ends up once it leaves the gutter.

A Fishy Day

Johan learns how fish breathe underwater and embarks upon a quest to find the fastest fish.

Through Rain and Snow

Johan and friends must solve the puzzle of how to hold condensate using a toothpick.

Finding Treasure in Living Colour

The kids learn about the masking qualities of primary colors and also about camouflage.

Moved to Fly

Professor Hoo teaches the kids about birds and sends them on a hunt for a very peculiar one.

Way Over the Rainbow

Professor Hoo explains how rainbows form and helps the kids locate one.

Power for the People

Johan, Ani, and Moki learn how power plants use different methods of generating electricity.

Feeding Frenzy!

Professor Hoo explains the difference between herbivores, carnivores, and omnivores.

Earth's Attraction

Johan wonders why people don't fall off the round Earth. He travels to ScienScape to find out.

Happily Floating Away!

Johan and friends learn why certain things float and certain things sink.

Patrolling for Petroleum

After a briefing from Professor Hoo about how oil is formed, the kids decide to find oil for themselves.
